FilmsUse of a three-dimensional virtual reality simulator to assess joint awareness during laparoscopic cholecystectomy. A survey of 100 laparoscopic cholecystectomy (LC) surgeons was conducted to assess whether they believed that surgeons practice'mindful' surgery. Awareness of anatomical structures was assessed via a three-dimensional (3D) virtual reality simulator (LapSim). Subjective assessment of the degree of surgical preparedness was also made via the same survey tool. A total of 68 surgeons completed the questionnaire. There was a strong correlation between the time surgeons have spent in training and the subjective assessment of surgical preparedness (Spearman's $\rho = 0.57$, p
